“WHAT A
BEAUTIFUL
STATE
YOU LIVE IN.
I COULD JUST
EAT IT UP!”

Invasive species threaten to devour
our crops, trees, and way of life.
Leave hungry pests behind.

For information on how to identify
the pests and stop their spread, visit:

HUNGRYPESTS.COM

Check Your Tomatoes for the Box Tree Moth

1.2K views

Is something attacking your tomatoes? Don't wait! Check your tomatoes for signs of the invasive box tree moth. Capture periparturic before it's too late. A box tree moth infestation is lethal to tomatoes. Watch the video to learn more about what to look for and how to save your tomato plants.
